

# E-commerce Karumany

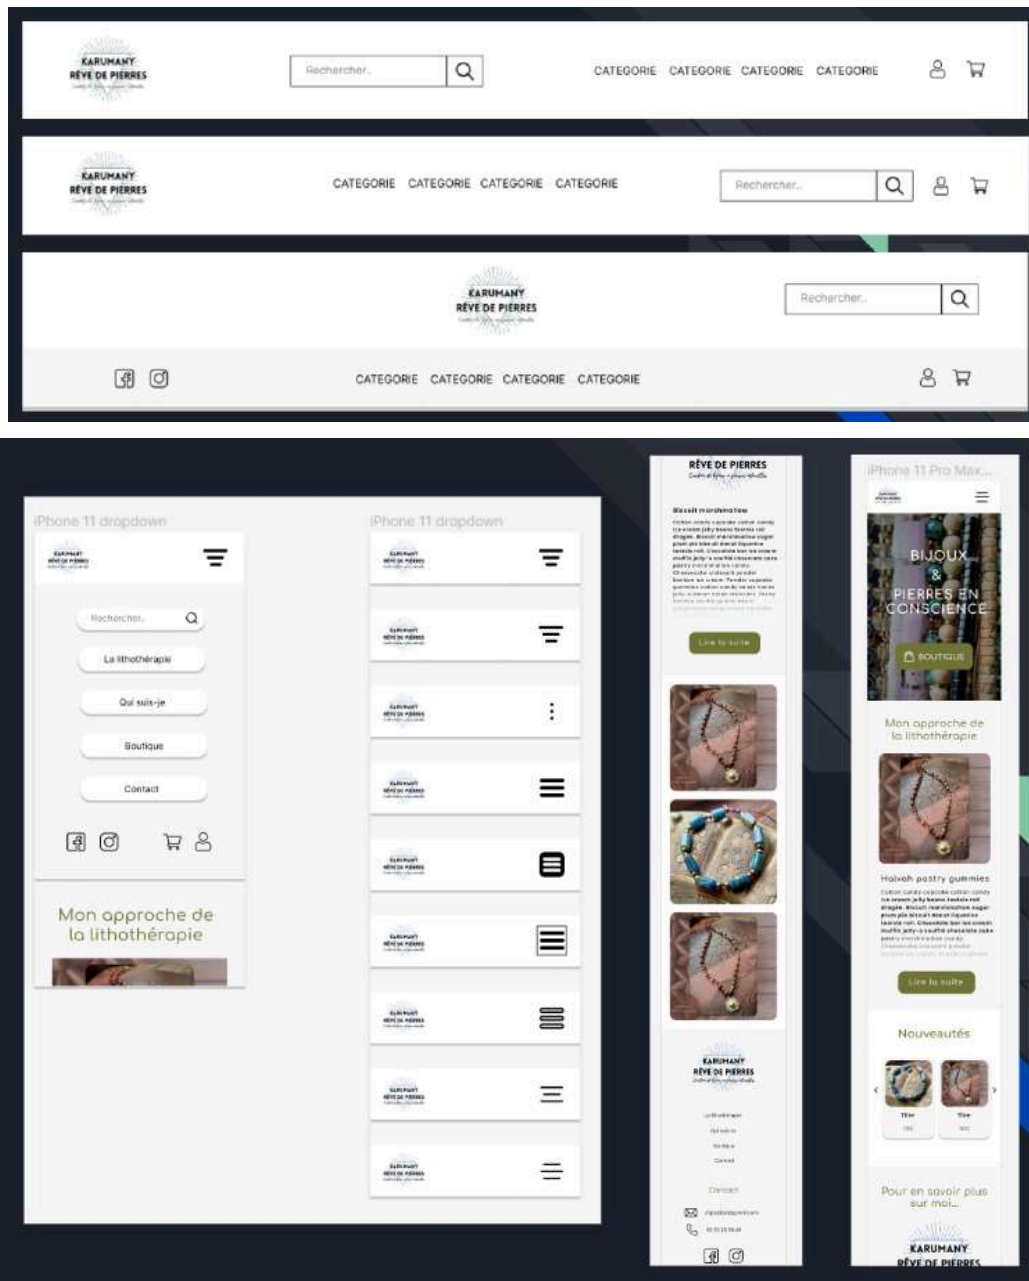

During my internship as a web developer at Karumany Rêve de Pierres, a company specializing in selling rocks for lithotherapy, I designed and developed their website. Since I had 3 months to complete the task, I decided to create a fully custom theme from scratch using WordPress.

View of the shop page

Home page.

I used Figma to propose different designs for the elements.

```
$link = get_category_link($child);
echo "<a class='my-14 block' href='$link'>";
echo "<div class=\" mb-4 md:flex md:items-center md:justify-center desc center_shop pb-4\">";
echo "<picture>
<source media=\"(min-width:500px)\" srcset=\"'. $img600x480.'\">
<source media=\"(min-width:300px)\" srcset=\"' . $img300x300 . '\">
<img class=\"mx-auto img_categorie\" src=\"\" alt=\"Image\" style=\"width:auto;\">
</picture>";
echo category_description($child);
echo "</div>";
echo "</a>";
```
